

LEGATO PEDALLING EXERCISE

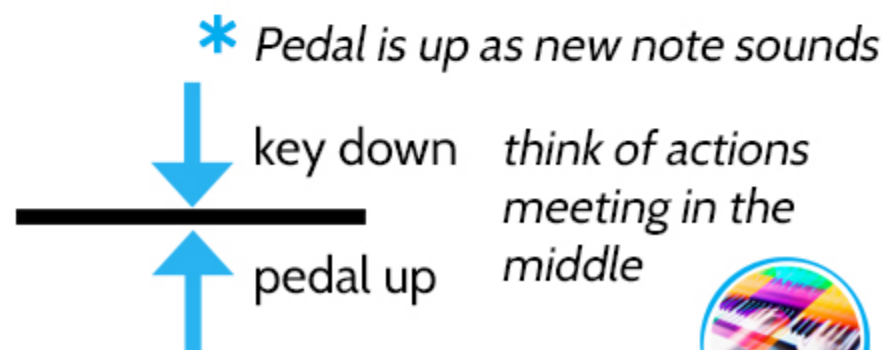

Play a C major scale in your right hand, using your 3rd finger *only* to play each note.
(This way you can not make the scale sound smooth.)

Do the following action on each beat:

1	2	3	1	2	3	1
Play note	Push pedal down	Lift finger & move to new note	Play new note & lift pedal *	Push pedal down	Lift finger & move to new note	Play new note & lift pedal

The most important thing to remember
about legato pedalling!!.....

The pedal is UP when you play the new
note and you put it down AFTER you've
played it.

Watch the associated video on YouTube or at accelerandopiano.com

when the key is fully down, the pedal is fully up
